Subject: Application for the position of PHP Programmer (Laravel).
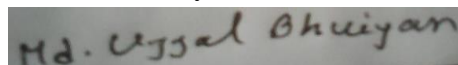

Dear Hiring Manager,

I am excited to apply to the PHP Programmer as advertised in the facebook.com on 18 Oct 2019. I am interested for the position of PHP Programmer at your Company. I looked through the requirements that you mentioned and my skill areas, academic qualifications, proficiency, and experience which match the requirements of the position.

I have a B.Sc. in Computing and Information System from the Daffodil International University (waiting for result).I have knowledge in various programming language such as C, Java, PHP (OOP, PDO), Python, Javascript, ActionScript. I also have knowledge of Data Structure, Algorithm, Networking, UI Design, Laravel Framework, VueJs, Jquery, API, Bootstrap, HTML5/CSS3, git and tools/editor such as adobe animate/photoshop, Eclipse, Visual Studio Code and so on. I am quite focused about making my career in the web development sector. During my academic study, I was participate in various seminars and workshops. And I have completed some academic project and manage client project which are mentioned of my résumé. Recently I am learning about emerging technology specially IOT, Cloud Computing and Block Chain.

I am self-learner, self-motivated, problem-solving, commitment and ability to work as a team or independently which helps to complete tasks on time and trying to follow agile methodology. I believe that my academic knowledge and project experience would add value to your organization. I've attached a copy of my résumé that details my projects and experience in web development. Please feel free to call me at 01671447679 or via email at ujjalbhuiyan123@gmail.com.

Thank you for your precious time and considering my document. I hope to meet with you soon to discuss the particulars of this position in more detail.

Yours sincerely,

Md. Ujjal bhuiyan
